

FACULTY OF APPLIED SCIENCE & ENGINEERING

Centre for Global Engineering

The Centre for Global Engineering is hiring a summer student(s) to work on the ongoing design and development of a fully integrated toilet prototype. The student(s) will provide support in, experimentation, research, and design. Duties will include lab maintenance, experimental design and setup, as well as research and reporting.

Qualifications

- Demonstrated ability to work in a fast-paced team environment
- Experience working in a laboratory setting
- Capable of hands-on troubleshooting
- Superb communication skills
- Experienced with Microsoft Excel/Office, and other software suites

Job Responsibilities

- Performs data collection including literature reviews, document reviews, applying applicable data gathering and analysis techniques, identifies, assembles, and effectively uses information from multiple sources.
- Strong fundamentals in chemical engineering but can be dynamic and agile with a demonstrated ability to apply knowledge from related areas
- Ability to adapt to a constantly changing research environment
- Experience in a biosafety hazard level 2 lab, as well as with safely handling various waste streams using proper PPE.

Please send applications to stephen.sauder@utoronto.ca by April 17th

The University of Toronto is strongly committed to diversity within its community and especially welcomes applications from visible minority group members, women, Aboriginal persons, persons with disabilities, members of sexual minority groups, and others who may contribute to the further diversification of ideas.
