

Industrial Panel Members

Pulp and Paper Centre – Panel Discussion for Students

Oct 31, 2017, 4:30-5:30 pm, Room MP202

We have the good fortune to have 5 members of the pulp and paper industry (including 2 U of T alumni) from different companies to be panelist for an hour of discussion with students from Chemical and Mechanical Engineering. These individuals continue to make significant contributions to their companies, our research and the industry at large. This is an opportunity for you to learn more about the industry, its future, how you might apply your education and more. Please take advantage of this opportunity to come, listen and ask questions.

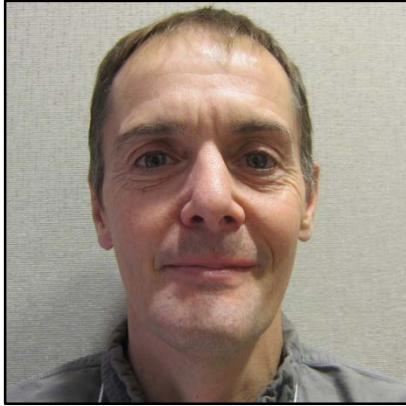

MARIA BJÖRK
